

a Ultrasonic transmission

b Isolated equant vesicles

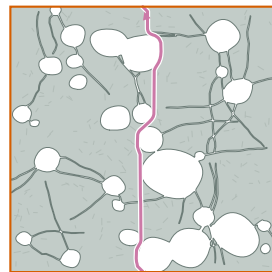

$\alpha \approx 1$, pore space unconnected

path length $1.09L$ · traveltime $1.09 t_0$

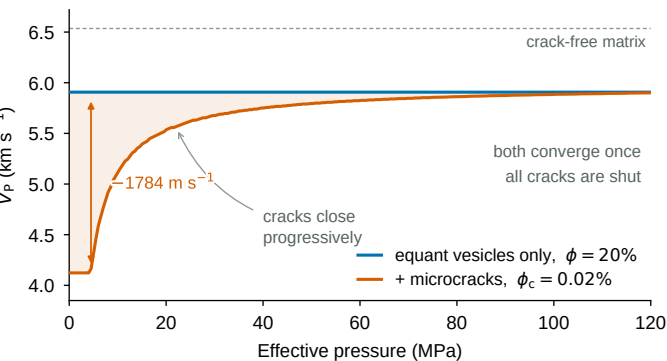

c Vesicles + microcracks

$\alpha \sim 10^{-4} - 10^{-3}$, connected network

path length $1.10L$ · traveltime $1.14 t_0$

d Crack closure with pressure

e Shape beats amount
